TECHNICAL SKILLS	
	Key Skills: React, Express, Node.js, Flask, PostgreSQL **Cloud:** AWS, Lambda, DynamoDB **Languages:** Ruby, Golang, Typescript, Python, HTML **Frameworks/Technologies:** Git, Enzyme, Bootstrap, RESTful APIs, Heroku, MongoDB **Additional skills:** Unit testing, Algorithms, Data Structures

WORK EXPERIENCE

Software Engineer   **January 2022 - January 2023**
Coinbase   Remote

- Lead the launch and post-launch maintenance of customer-facing products like authorized user lists for Coinbase Prime's 13,000 institutional clients, enabling them to trade billions of dollars in assets on the platform.
- Collaborated with UX designers, product managers, and key business stakeholders to ensure that revenue-generating products met the highest standards of functionality and accessibility using Typescript and Go.
- Designed backend APIs and features in Ruby that served the needs of both customers and developers.
- Handled the rollout of new features at every stage — planning, integration, testing, and scaling.
- Worked with the operations team to update the product directly based on client feedback.
- Delivered and maintained clean, accessible code and ensured the codebase was always up to standard.
- Created and presented a guide document that helped new hires get acquainted with internal systems and workflows.

TECHNICAL PROJECTS

MyGames — like Goodreads for gamers
- Designed and implemented a web app that allows users to save their favorite games and receive custom gaming recommendations.
- Developed so that users must create an account to use the site
- Built with Python / JavaScript / Flask / PostgreSQL / CSS / HTML

Showtunes
- Architected a web app to help users discover new music in their chosen genres.
- Created to reach the widest array of music through randomization of API results
- Built with React / PostgreSQL / Node / Express / jQuery / CSS / HTML

QuizBowl
- Built a web app that lets users to create shareable quizzes
- Implemented so that all quizzes are categorized by genre and accessed by the API
- Built with React / PostgreSQL / Node / Express / jQuery / CSS / HTML

EDUCATION

Springboard   **December 2021**
Full Time Software Engineering Track

Thinkful   **April 2021**
Full Stack Flex

Nassau Community College   **May 2020**
Associates in Computer Science
